Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. ***Claims 1-3 and 5-10*** are rejected under 35 U.S.C. 102(b) as being anticipated by Gritton (United States Patent 4,574,166).

Regarding **claim 1**, Gritton discloses a tandem adaptive filter arrangement. In addition, Gritton discloses a means for implementing, at the start of a communications session over a communications line, a plurality of echo cancellers to cancel echo on the communications line, the echo cancellers each operating to cancel echoes that arrive during a predetermined bandwidth of time, the predetermined band-widths of time being non-overlapping; means for training each of the plurality of echo cancellers to produce a cancellation signal that cancels echoes arriving during the predetermined bandwidth of time associated with the echo canceller; and means for eliminating after a predetermined training period, all echo cancellers that produce a cancellation signal below a predetermined threshold, as disclosed at column 3-6 and exhibited in figures 1 and 2.

Regarding **claim 2**, Gritton discloses everything claimed as applied above (see claim 1, in addition Gritton discloses wherein the bandwidths of time are equal in width to each other, as disclosed at column 3-6 and exhibited in figures 1 and 2.

Regarding **claim 3**, Gritton discloses everything claimed as applied above (see claim 2), in addition Gritton discloses wherein the non-overlapping bandwidths are each approximately 16 milliseconds apart, as disclosed at column 3-6 and exhibited in figures 1 and 2.

Regarding **claims 5-10**, they are interpreted and thus rejected for the reasons set forth above in the rejection of claims 1-3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. ***Claims 4 and 11*** are rejected under 35 U.S.C. 103(a) as being unpatentable over Gritton in view of well know prior art (MPEP 2144.03).

Regarding **claim 4**, Gritton discloses everything claimed, as applied above, (see claim 1), however, Gritton fails to disclose a graphical user interface. However, the examiner takes official notice of the fact that it was well know in the art to provide graphical user interface.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Gritton by specifically providing a graphical user interface, for the purpose of providing the user to control the adaptive filters.

Regarding **claim 11**, it is interpreted and thus rejected for the reasons set forth above in the rejection of claim 4.

Citation of Pertinent Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yip et al. (United States Patent 5,896,452), discloses multi-channel echo canceller and method using convolution of two training signals.

Mann et al. (United States Patent 6,493,448), discloses a process for echo suppression with adaptive FIR filters.

Duttweiler (United States Patent 5,631,899), discloses an acoustic echo canceller.

Andre (United States Patent 5,428,605), discloses a method and echo canceller for echo cancellation with a number of cascade-connected adaptive filters.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jefferey F. Harold whose telephone number is 571-272-7519. The examiner can normally be reached on Monday - Friday 9 am - 5:30 pm.
